

Index, Volume 25 (1984)

The index covers all contributions except lists of publications. The Subjects section aims to record all the peoples, sites, and culture-historical units mentioned in these contributions and the main topics discussed. References are listed only when they are central to an author's argument or constitute a major data source. The Contributors section lists the authors of all contributions.

NAIKAN PSYCHOTHERAPY

Meditation for Self-Development

David K. Reynolds

Widely practiced in Japan, Naikan is a system of psychotherapy unfamiliar to most Western clinicians and scholars. Naikan therapy emphasizes that each of us, by our own standards, fails to live a life of balanced giving and receiving and results in both a sense of healthy, existential guilt and a liberating sense of gratitude for all we have received from others. Reynolds draws on his substantial experience as both participant-patient and Naikan therapist to present a comprehensive description and analysis of Naikan therapy. He then considers the potential and the limitations of meditative therapy for Westerners.
